

Our book of the term is How to Train Your Dragon by Cressida Cowell which is the first in a series of stories that inspired a film series. We will also be reading How to be a Viking 'A Northlander's Guide' a detailed non-fiction book with many hidden

surprises as well as facts. We will be writing diaries, recipes and profiles of famous Vikings and will listen to some traditional Viking stories.

Using knowledge from our English work, in History we will learn about Anglo-Saxon Britain and the Viking Invasion. Our visitor will enhance this learning in an exciting Viking workshop day.

In Maths this term we will be learning some new strategies to help us solve problems. We will be building on our skills using 2 and 3-digit numbers and applying these to solving problems with money. We will then move on to learning more about telling the time using analogue and digital clocks.

Flowering plants is the theme for our learning in Science. We will learn about the function of different parts of a plant, what they require for life and growth and also the stages of a flowering plant's life cycle.

Our Music genre of the term is Electronic Music. What sort of instruments are used to make this music? Can you find a favourite song or piece?

REMINDERS

Miss Woodward and Mrs Loughran's class will be swimming again this half term. Mr Yates' class will continue to do P.E. on a Wednesday afternoon.

Remember we have moved to request children wear a plain t-shirt and shorts or jogging bottoms.

Please encourage your child to access homework challenges on Spelling Shed, MyMaths and Times Tables Rock Stars. Our key times tables are 3s, 4s and 8s. Look out for extra holiday challenges too.

Read with your child at home every day and make sure they bring their book and diary to school each morning to be changed.

Help your child practise their weekly spellings. This is extremely important as it will really help with their writing independence.

This term's Jigsaw theme is Healthy Me. We will teach the children the importance of exercise to stay healthy, about the role and importance of the heart and lungs and the impact of consuming too much fat and sugar.
